Hi Tala,

Hope you are doing well. I'm sure you're really busy so I will be brief.

A small group of us (some from the "Usability" workshop we had on ecotox data) are looking at creating some kind of SETAC document on WoE. We are not seeking to re-create the wheel but would like to focus on presenting some case studies. We had an initial call and now are looking to add a few other key constituencies to the team.

I volunteered to reach out to you to see if you (or someone from your group) would like to be involved with this effort. The essence of it is described below and in the attachments.

I believe we will be having another call later this month so it would be great to identify someone from the TSCA program who would like to be involved.

Best regards,
Jane

Subject: [EXTERNAL] RE: Proposed SETAC Guideline on the Use of Weight-of-Evidence

CAUTION: This Email is from an EXTERNAL source. Ensure you trust this email address before replying or clicking on any links or attachments.

Dear Jane,

I hope this e-mail finds you and your family doing well during these uncertain times. I am contacting you to inquire about your interest in being part of a SETAC writing team charged with developing a new SETAC Guidance document on the use of Weight-of-Evidence (WoE). I have prepared a Draft Proposal document (see attached file) which describes the need, concepts, objectives and generalized structure for developing such a document. Also attached are a couple of other documents that are referenced within this Draft Proposal.

If you are interested in participating in this new SETAC initiative, please let me know ASAP (within the next week). Our plan will be to set up an initial Doodle Poll to secure a date and time when a small, group of us can convene (perhaps by Zoom) to discuss this idea and make some decisions about an appropriate path forward.

Thank you for your consideration of this important matter.

Best Regards,

Pat Guiney (on behalf of the proposed SETAC writing team)
